

## Helping Others Through Medical Ministry

The experience we have with healthcare in the USA is radically DIFFERENT from the experience of people in developing countries. People in underserved regions around the world are *dying of treatable causes every day.*

### **The Need for Quality Medical Care**

The need for healthcare is urgent, and the calling is clear: to improve the health of the poor, the developing world needs more hospitals and clinics staffed by well-trained doctors and nurses. And if this improvement is to be long-term and sustainable, **these facilities must be locally owned and self-sufficient.**

### **About Us**

Medical Benevolence Foundation (MBF) is an international Christ-centered organization. We are dedicated to building long-term partnerships to **equip the local church in each country to meet their community's healthcare needs** and share God's good news.

We equip the medical ministries of local churches — like this maternity clinic in **Malawi** — to administer the care **their communities so badly need.**

# Key Facts

MBF has made quality medical care available in 34 countries over the past 57 years. Today your gifts to MBF help people in Haiti, Malawi, DR Congo and Kenya through:

## HOSPITALS AND CLINICS

**12 hospitals**  
with nearly  
**2,000 beds**

**37 Primary  
Care Clinics**

Over **800,000**  
**patient visits**  
in FY20

**25,000 new babies born** at  
partner facilities in FY20

## SPIRITUAL MINISTRY

Spiritual ministry training for  
healthcare professionals

## NURSING SCHOOLS

Global Center for Nursing Development

**7 Nursing  
Schools**

**92 Nursing  
Scholarships**

## SERVICES FOR WOMEN & CHILDREN

Health services for women and infants to  
reduce infant and maternal mortality

Prenatal, neonatal and  
post-natal care

Financial assistance for C-sections to help  
prevent maternal deaths

## Our Work

MBF has made quality medical care available in 34 countries over the past 57 years. **Faith-based organizations like MBF provide 20–50% of health services in developing countries.** Only because of organizations like MBF, millions of men, women and children can see a doctor, receive medical treatment, and access medicines and supplies.

We support the underserved as they build hospitals and clinics and train nurses and physicians to practice medicine in their own countries. We are partners.

**We organize, fortify, and facilitate to cultivate development, not dependency.**

This is why we exist. We believe the church is God's chosen instrument of change, so we equip the local church to create a medical ministry for their community.

## Get Involved and Transform Lives

We believe that the afflictions of the poor are the responsibility of the faithful. It's a joy to do the Lord's work, so **we invite you give a gift to medical mission and get involved in the blessing of helping others through medical ministry.**
